The Wellbeing art Ibiza by Marina Prohens

Commissioned to Shanghai-based, award-winning architects A00, each structure was designed to create an intimate relationship with nature while framing its views. The architects drew inspiration from the land, ensuring that all new buildings blend seamlessly into the landscape while preserving the existing environment. The Tree Houses rest lightly on the hillside, suspended between stillness and sky. The Cottages honour local heritage, where tradition meets quiet modernity. The Garden Suites follow the natural slope of the land—a soft, minimal rhythm folded into the earth. Recognized internationally by The New York Times, Condé Nast Traveller, and National Geographic, the retreat offers a curated experience of Sri Lanka's natural beauty, warm hospitality, and timeless cultural heritage.

The De-Stress & Balance Program helps restore balance to your life through a fusion of techniques from Traditional Chinese Medicine and Ayurveda. It is designed to meet each individual's needs, bringing rejuvenation and harmony to both body and mind. This program helps reduce stress and anxiety, improve insomnia, release emotional blockages, and create an overall sense of well-being.

Chinese Medicine Detoxification uses gentle methods to restore the body's natural balance. Stress can block the flow of energy, making it easier for toxins to accumulate.

Chinese Medicine (TCM) helps unblock stagnant energy and supports the body in releasing toxins. It may help prevent emotional eating, reduce cravings, improve digestion, and support conditions such as bloating or water retention/edema.

This approach also helps balance hormones and supports women's health, promoting overall harmony.

A customized program combines a variety of treatments to harmonize, optimize, and rebalance your health at the physical, psycho-emotional, and energetic levels, offering an integrated approach.
